## PROJECTS

### Pintrospective

[Live](#) • [Github](#)

A Pinterest clone for visual artists, built with Ruby on Rails and Backbone.js

- Creates and updates two models simultaneously using nested attributes and wrapped parameters.
- Reduces number of  $n + 1$  queries by using `:includes`, which loads model associations using the minimum number of queries.
- Consumes a RESTful Rails API which also includes custom routes.

### ChApp Room

[Live](#) • [Github](#)

A Chat App using Node.js.

- Uses Socket.IO to add cross-browser support to websockets.
- Uses node-static to serve static files.

### Do Tha Dang Thang

[Live](#) • [Github](#)

A simple Trello clone, built with Ruby on Rails and Backbone.js

- Uses jQueryUI's sortable method to enable sorting of lists and cards, which persist in the DB.
- Extends Backbone's View to support composite views, allowing for nested sub-views.
